Spinning

A host of possibilities

We are among the very few French companies that still have a spinning mill.

In the Vosges département, in our plant in Le Thillot, we produce 300 tons of yarn on average per month, from single yarn to folded yarn.

We offer two types of yarn, *open-end carded* and *conventional carded*. That allows us to adapt to customers' needs and expectations, while guaranteeing exceptional quality regardless of the material used.

Our yarn fully meets the requirements of weaving, knitting and dying, with over 50 different products from Nm 8 to Nm 60.

Here are some of our most common compositions:

► 100% cotton

► 100% organic cotton with GOTS certification

► 33% polyester carbon
► 67% long-staple cotton

► 65% cotton

► 35% polyester

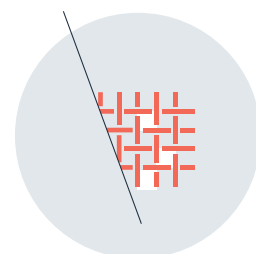

► 35% cotton

► 65% polyester

► 50% polyester

► 50% cotton

Contact us for bespoke compositions!

Weaving

Highly diversified products

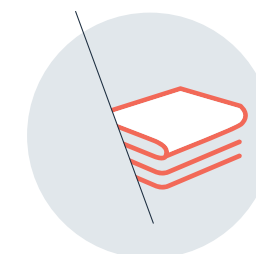

Our weaving workshops are directly supplied by our spinning unit. That gives customers the guarantee of valuable flexibility and responsiveness.

While we originally focussed on cotton, we now have the capability, thanks to a series of projectile weaving machines and air jet machines producing single or multiple widths, of offering *superior weaving quality with all types of fibre*, whether natural (linen, hemp, bamboo, etc.) or blended (acrylic, polyamide, polyester, viscose, etc.). Most of our machines have dobbies, which means that we can produce very complex weaves. We can make fabric that is heavy, lightweight, narrow or wide, as our equipment adapts to all requirements.

Thus, the versatility and modernity of our unit offer very high product variety.

Do you want to take charge of sewing?
Come to us for your grey or more premium fabrics.

Complete expertise from spinning to sewing.

Tailoring

Fully automated production

The product range is extremely diversified, and is intended for collective facilities, linen rental companies and large hotel groups:

bed sheets, pillow covers, draw sheets, duvet covers, surgical drapes, towels, glass cloths, dish cloths, diapers, aprons, etc.

All these items are available in grey, bleached or dyed.

Our figures tell it all!

3 million bed sheets/year

3000 tonnes of yarn/year

140 weaving machines

10 million metres of fabric/year

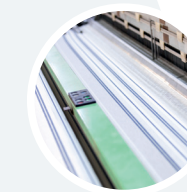

20% exported

600 customers in Europe

3 production plants
